

PEACH TEATS

Calves love 'em!

Peach Teats are popular in leading calf feeder markets around the world

- Rapid acceptance - calves latch on and stay on
- Ideal for weak and sick calves
- Most closely simulates a cow's natural milk let down
- The threaded attachment method allows easy removal for cleaning or replacement

The non-return valve never closes in its relaxed state so it cannot be blocked. It is designed to function like a real cow's teat, moving all the time while the calf is suckling.

There is a milk opening on each side of the nipple, situated so that the crown of the nipple remains intact and ensures that the teat is leak resistant.
